

GALISTA[®]
SAFETY PRODUCTS

“**PROTECTING EVERY STEP**
INNOVATION, SAFETY, TRUST”

Catalogue

www.galista.in

WHO WE ARE

Galista Safety Products is committed to safeguard lives through innovation, quality and reliability. Established with a vision to set new benchmarks in the safety industry, we specialize in the manufacturing of high-performance industrial safety footwear designed to meet the most demanding work environments.

With state-of-the-art facilities located in Bahadurgarh, Haryana, India and a team of skilled professionals, we combine advanced technology with uncompromising quality standards to deliver products that ensure protection without compromising on comfort or style.

Every product under the Galista name reflects our core values — integrity, durability, performance and customer-first thinking. Our offerings meet and exceed national and international standards, including:

- IS 15298 Part 2: 2024
- IS 15298 Part 3: 2024
- IS 15298 Part 4: 2024
- IS 15844 Part 1: 2023
- CE
- ISO 20345: 2021
- ISO 9001: 2023
- ASTM F2413
- CSA Z195
- AS/NZS 2210.3
- EN ISO 20347

We proudly export our products to SAARC nations, the European Union, Africa, the Gulf region, and other international markets providing safety solutions that are globally trusted and locally respected.

With a relentless focus on performance and protection, Galista Safety Products ensures that wherever you work, you're always one step ahead in safety.

TECHNOLOGY THAT PUTS THE SAFE IN SAFETY FOOTWEAR

INFRASTRUCTURE & CAPABILITIES:

At Galista Safety Products, we have built a robust and future-ready infrastructure that empowers us to deliver premium safety footwear to industries across the globe. Our advanced production units in Bahadurgarh are designed to support high-volume manufacturing while maintaining the highest levels of quality, consistency, and innovation.

MODERN MANUFACTURING FACILITIES:

- Two state-of-the-art units designed for streamlined, large-scale production
- Fully integrated processes to ensure efficiency, precision and reduced lead time
- Scalable systems that meet both domestic and global demand

DESIGN & PRODUCT DEVELOPMENT:

- Dedicated in-house Design Studio & R&D Lab
- Fusion of ergonomics, safety, and aesthetics
- Use of modern tools for 3D design, prototyping, and customization
- Product innovation aligned with global safety trends and user comfort

QUALITY & TESTING INFRASTRUCTURE:

- ISO 9001:2023 certified quality management systems
- In-house quality control laboratory for all stages of production
- Compliance with BIS (IS), CE, ISO, ASTM, CSA, and other international standards
- Strict material inspection and performance validation before dispatch

RAW MATERIAL ASSURANCE:

- Sourcing from certified and high-grade suppliers
- Strict incoming material checks to ensure consistency and durability
- Commitment to using environment-friendly and performance-driven materials

Global Compliance Our products are manufactured to meet and exceed multiple international standards including: IS 15298 (Part 2, 3 & 4: 2024), IS 15844 Part 1: 2023, CE, ISO 20345: 2021, ISO 9001: 2023, ASTM F2413, CSA Z195, AS/NZS 2210.3, EN ISO 20347

Export Excellence, We proudly serve customers across India and export to: SAARC | European Union | Africa | Gulf | Other International Markets. Our global presence is built on the foundation of trust, performance, and consistency.

OUR PROMISE:

Every pair of footwear that leaves Galista's facility carries our promise of safety, durability, comfort, and compliance — engineered with precision, tested for resilience and trusted across industries.

OUTSOLE MATERIALS

POLYURETHANE (PU)

Polyurethane is a foamed polymer material. To form an outsole, liquid PU is poured or injected into an outsole mould. PU outsoles are **very comfortable**, **durable**, **lightweight** and offer **great shock absorption**, thanks to the high elasticity and soft texture of the material.

There are 2 types of PU outsoles:

- **A single-density PU outsole** is made of one material compound.
- **A double-density PU outsole** is made of two different material compounds.

During production, a first layer of PU is added to the mould. This first layer is the bottom layer that will eventually touch the ground when walking. Then the second layer, a softer and more flexible one, is added into the mould. This second layer will determine the cushioning and overall comfort of the outsole.

RUBBER

Rubber is the **most versatile material**. It is suitable for a very wide range of environments and applications. Compared to PU and TPU, rubber is slightly heavier but offers a lot of advantages. It is exceptionally **slip resistant and heat resistant** (up to 300°C), extremely **durable**, **resistant to strong acids** and it has a **better cut resistance** than PU or TPU.

When rubber is combined with a layer of PU, EVA or Phylon, the outsole becomes lighter and softer. Galista always uses nitrile-based rubber (NBR) in its outsoles for enhanced performance

PVC

PVC is mostly used in competitively priced footwear and mono-material products like rain boots. It is **resistant to most chemicals** and provides **good abrasion resistance**, but limited heat resistance.

UPPER MATERIALS

LEATHER

Natural (full-grain) leather is the best choice for footwear. Animal hide, made durable through a complex tanning process, has been used for footwear for thousands of years. It is extremely durable, **tear resistant**, **abrasion resistant**, **temperature controlling**, **breathable** and **flexible**. This material primarily stems from the meat industry, where skins are mostly considered waste. Depending on the quality and price level, leather can show different surface structures such as full grain, corrected grain, PU-coated (action) leathers, nubuck and suedes. Other features such as waterproofness can be added during the tanning process.

SYNTHETICS

Compared to leather, synthetic materials are **lighter**, **less expensive** and have a **homogeneous structure**. Certain functions such as waterproofness can be added more easily.

MICROFIBRES

Microfibres are synthetics as well, but with a **higher quality level**. They are used as a (vegan) alternative to suede, nubuck or nappa leathers of animal origin. Microfibers show impressive **performance levels in terms of abrasion, tensile strength, breathability and weight**.

TEXTILE AND KNITWEAR

Textile and knitwear uppers are extremely **lightweight** and **breathable** thanks to the open structure. By choosing specific yarns, extra features such as abrasion resistance, cut resistance, etc., can be added to the material.

PUNCTURE-RESISTANT MIDSOLE MATERIALS

A **puncture-resistant midsole** protects the shoes and feet against the penetration of nails through the sole. It's embedded between the footbed and outsole of puncture-resistant footwear.

Footwear certified to **EN ISO 20345** or **EN ISO 20347** and marked with **all S1P, S1PS, S3, S3S, S5, S5S, S7, S7S, O3, O3S, O5, O5S, O7 or O7S codes** has a puncture-resistant midsole.

P

Steel

- ▶ Made from coated steel or stainless steel
- ▶ Budget friendly and thin but not flexible
- ▶ Conducts cold, heat and electricity
- ▶ Not metal free

PS / S PL / L

Puncture-resistant textile

- ▶ Made from aramid fibers
- ▶ Flexible but heavier
- ▶ Does not conduct heat or cold
- ▶ Metal free

PS / S PL / L

Nonwoven

- ▶ Made from nonwoven fibers
- ▶ Lightweight and flexible but more expensive
- ▶ Does not conduct heat or cold
- ▶ Metal free

Puncture-resistant test nails

According to the EN ISO 20345:2022 standard, the puncture resistance of footwear must be tested using a slim (3mm) or a large (4.5mm) nail.

Metallic midsoles are always tested with the large nail and marked with 'P'

P

Non-metallic midsoles can be tested with either nail:

▶ Test with slim nail: marked 'PS' or 'S'

PS / S

▶ Test with large nail: marked 'PL' or 'L'

PL / L

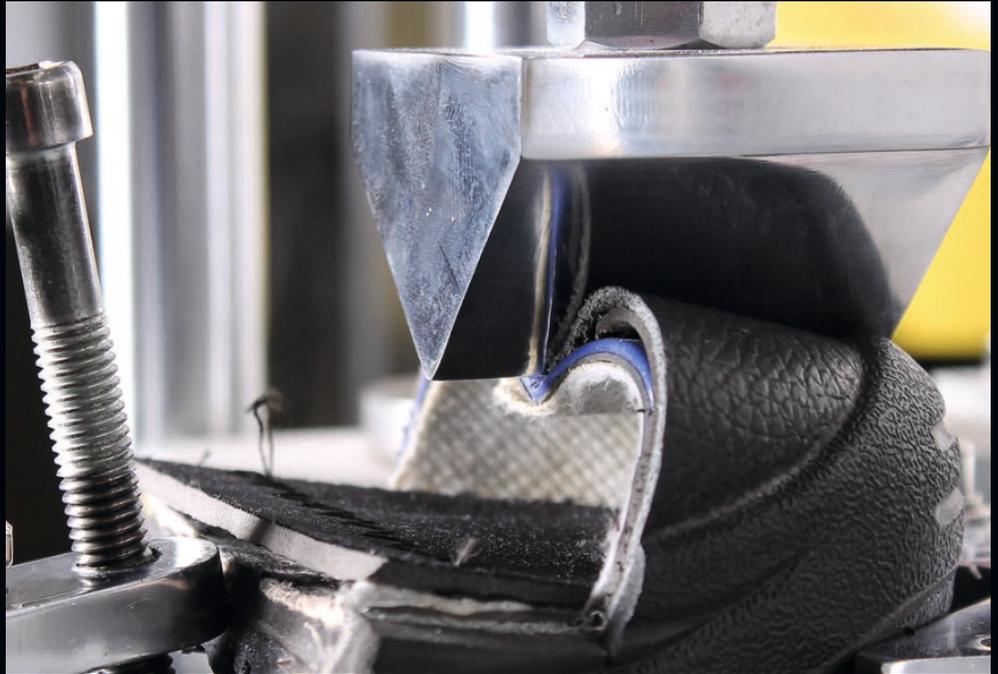

4.5mm

3mm

TOE CAPS

A **protective toe cap** made according to the European and ASTM standard will protect feet from impact and compression injury, regardless of the material.

If safety shoes are certified to **EN ISO 20345**, they come with **certified protective toe caps** that withstand a force of **200 Joule**. Protective footwear certified to **EN ISO 20346** comes with certified protective toe caps that withstand a force of **100 Joule**. Occupational shoes that are certified to **EN ISO 20347** **do not offer** toe protection.

Toe caps, protection from the inside out

TOE CAPS

Steel

- ▶ Made from coated steel
- ▶ Budget friendly and thin but heavier
- ▶ Conducts cold, heat and electricity
- ▶ Not metal free, magnetic

Aluminium

- ▶ Made from aluminium
- ▶ 30-50% lighter than steel
- ▶ Thicker and bulkier
- ▶ Conducts heat and cold
- ▶ Not metal free, non-magnetic

Composite

- ▶ Made from non-metal materials such as fiberglass and carbon fibre
- ▶ Thicker and bulkier
- ▶ 30% lighter than steel
- ▶ Does not conduct heat or cold
- ▶ Metal free, non-magnetic

Nanocarbon

- ▶ Made from carbon nanofiber
- ▶ Thin but more expensive
- ▶ 50% lighter than steel and 40% lighter than composite
- ▶ Does not conduct heat or cold
- ▶ Metal free, non-magnetic

TECHNICAL FEATURES

Toe protection

Shoes with a safety toe cap prevent crushing of the toes in case of impact or compression.

Antistatic

Antistatic shoes prevent a build-up of static energy inside the body, avoiding sparks that could cause ignition of gases, fire or explosions.

Puncture resistance

These shoes have a puncture-resistant midsole that protects the feet against the penetration of sharp objects

Waterproof

For shoes that are completely waterproof thanks to a membrane.

Water penetration and absorption

For shoes that keep your feet dry for a limited time.

Slip resistance

Safety shoes are all required to be slip resistant (tested on a ceramic floor with a soap solution). For added protection, some shoes undergo an extra slip-resistant test on a ceramic floor with glycerine (an oily solution). If they pass, they are marked "SR".

Heel energy absorption

Reduces the impact of jumping and running on the body by absorbing shocks and returning energy.

Cleated outsole

Protrusions on the sole of the shoe provide additional traction on a soft or slippery surface.

THE NEW STANDARD FOR SAFETY FOOTWEAR EXPLAINED - EN ISO 20345:2022

-  Toe protection (≥200 Joules)
-  Basic slip resistance (ceramic floor+ soap solution)
-  Closed heel
- A** Antistatic
- E** Heel energy absorption
- UPDATE** **WPA** Water penetration and absorption
- WR** Waterproof
- UPDATE** **P** Metallic puncture resistant midsole (4.5mm nail)
- NEW** **PL** / **L** Non-metallic puncture resistant midsole
PS / **S** PL = large nail 4.5 mm
 PS = slim nail 3 mm
-  Cleated outsole cleat height ≥ 3.5 mm)

CLASS 1 made from leather, textiles or synthetic materials

CLASS 2 made from rubber or polymeric materials

Additional features

AN	Ankle protection
M	Metatarsal protection
NEW	SR Slip resistance (ceramic floor + oil solution)
A	Antistatic
NEW	LG Ladder grip
NEW	SC Abrasion resistant scuff cap
CI	Cold insulation
HI	Heat insulation
HRO	Heat-resistant outsole (up to 300°C)
UPDATE	P Metallic puncture resistant midsole (4.5mm nail)
NEW	PL Non-metallic puncture resistant midsole (4.5mm nail)
NEW	PS Non-metallic puncture resistant midsole (3mm nail)
UPDATE	WPA Water penetration and absorption
WR	Waterproof
E	Heel energy absorption
UPDATE	FO Oil & fuel resistance

 Electrostatic discharge (EN 61340)

 Electrical hazard (ASTM F2413)

Did you know...

that the EN ISO 20345 standard has changed since 2022?

Slip resistance

EN ISO 20345:2011

Slip resistance had three different ratings: SRA, SRB and SRC.

- ▶ SRA outsoles were tested on a ceramic floor wetted with a soap solution.
- ▶ SRB outsoles were tested on a steel surface wetted with an oily solution (glycerin).
- ▶ SRC outsoles passed both the SRA + SRB test.

EN ISO 20345:2022

The slip-resistance test on a ceramic floor with a soap solution is from now on a **basic requirement** for all safety shoes, so no marking will be added. An extra slip-resistant test on a ceramic floor with glycerin (an oily solution) can be carried out as an **additional requirement** and will be marked **SR**.

Puncture resistance

EN ISO 20345:2011

P was marking puncture resistance.

EN ISO 20345:2022

The P marking is now used only for metallic midsoles. Shoes with non-metallic midsoles (fabric or nonwoven midsoles) are now marked PL or L / PS or S, depending on the type of nail.

PL or L = puncture test passed with a nail of 4.5 mm

PS or S = puncture test passed with a nail of 3 mm

Fuel & oil resistance

This is no longer a mandatory requirement. If the outsole is fuel & oil resistant, it is marked FO.

New categories

New S6 & S7 categories: to identify safety shoes that are completely waterproof thanks to a **membrane**.

The S6 label corresponds to an S2 WR shoe.

The S7 label corresponds to an S3 WR shoe.

WRU becomes WPA

Shoes with a **water-resistant** upper are now marked as WPA. WPA refers to the water penetration and absorption tests that are performed to determine the water resistance of the upper.

New additional features

SC: abrasion resistance of the **scuff cap**.

LG: adequate **grip** on a **ladder**.

FOOT PROTECTION

As every new pair of Galista Safety Footwear is crafted in our factory, it passes through many skilled hands each adding their own touch of precision and dedication. At Galista, we believe in a hands-on, collaborative approach where our people work together seamlessly to bring quality to life.

Our footwear takes shape through the craftsmanship of experienced professionals whose expertise and commitment have been refined over generations. Every pair reflects the hard work, passion, and integrity that define Galista.

When you wear Galista Safety Footwear, you wear the strength, authenticity, and reliability that match your own.

- **OUTSOLE:** HEAVYDUTY, ANTI-SLIP CLEATED OUTSOLE FOR FIRM GRIP
- **UPPER RESISTANCE:** WATER, MILD ACID, OIL & CHEMICAL RESISTANT
- **FIT:** ERGONOMICALLY SHAPED FOR ANKLE SUPPORT & EASY MOVEMENT

Suitable for:

IS 15298 Part 4

CM/L No. 9512525620

ARTICLE:
PILOT | SIZE: 5-10
LENGTH: 13 INCHES

RUGGED, WATERPROOF PVC GUMBOOTS

SPECIFICATION

- **MATERIAL:** HIGH QUALITY PVC COMPOUND
- **LINING:** SOFT COTTON FABRIC FOR BREATHABILITY & EXTENDED COMFORT
- **CONSTRUCTION:** SEAMLESS, ONE PIECE WATERPROOF DESIGN
- **OUTSOLE:** HEAVYDUTY, ANTI-SLIP CLEATED OUTSOLE FOR FIRM GRIP
- **UPPER RESISTANCE:** WATER, MILD ACID, OIL & CHEMICAL RESISTANT
- **FIT:** ERGONOMICALLY SHAPED FOR ANKLE SUPPORT & EASY MOVEMENT

Suitable for:

IS 15298 Part 4

CM/L No. 9512525620

ARTICLE:
RYDER | SIZE: 7-11
LENGTH: 13 INCHES

RUGGED, WATERPROOF PVC GUMBOOTS

SPECIFICATION

- **MATERIAL:** HIGH QUALITY PVC COMPOUND
- **LINING:** SOFT COTTON FABRIC FOR BREATHABILITY & EXTENDED COMFORT
- **CONSTRUCTION:** SEAMLESS, ONE PIECE WATERPROOF DESIGN
- **OUTSOLE:** HEAVYDUTY, ANTI-SLIP CLEATED OUTSOLE FOR FIRM GRIP
- **UPPER RESISTANCE:** WATER, MILD ACID, OIL & CHEMICAL RESISTANT
- **FIT:** ERGONOMICALLY SHAPED FOR ANKLE SUPPORT & EASY MOVEMENT

Suitable for:

IS 15298 Part 4

CM/L No. 9512525620

Foot Protection

ARTICLE:
MAGNUM | SIZE: 5-11
LENGTH: 15 INCHES

RUGGED, WATERPROOF PVC GUMBOOTS

SPECIFICATION

- **MATERIAL:** HIGH QUALITY PVC COMPOUND
- **LINING:** SOFT COTTON FABRIC FOR BREATHABILITY & EXTENDED COMFORT
- **CONSTRUCTION:** SEAMLESS, ONE PIECE WATERPROOF DESIGN
- **OUTSOLE:** HEAVYDUTY, ANTI-SLIP CLEATED OUTSOLE FOR FIRM GRIP
- **UPPER RESISTANCE:** WATER, MILD ACID, OIL & CHEMICAL RESISTANT
- **FIT:** ERGONOMIALLY SHAPED FOR ANKLE SUPPORT & EASY MOVEMENT

Suitable for:

IS 15298 Part 4

CM/L No. 9512525620

ARTICLE:
LEXUS | SIZE: 5-12
LENGTH: 15 INCHES

RUGGED, WATERPROOF PVC SAFETY GUMBOOTS

SPECIFICATION

- **MATERIAL:** HIGH QUALITY PVC COMPOUND
- **LINING:** SOFT COTTON FABRIC FOR BREATHABILITY & EXTENDED COMFORT
- **CONSTRUCTION:** SEAMLESS, ONE PIECE WATERPROOF DESIGN
- **OUTSOLE:** HEAVYDUTY, ANTI-SLIP CLEATED OUTSOLE FOR FIRM GRIP
- **TOE CAP:** 200 JOULES IMPACT-RESISTANT TOE CAP FOR RELIABLE PROTECTION IN DEMANDING WORK ENVIRONMENTS.
- **UPPER RESISTANCE:** WATER, MILD ACID, OIL & CHEMICAL RESISTANT
- **FIT:** ERGONOMIALLY SHAPED FOR ANKLE SUPPORT & EASY MOVEMENT
- **SUITABLE FOR:** ENGINEERING, CEMENT INDUSTRIES CONSTRUCTION, MINING & RAILWAYS, SPECIALLY DURING MONSOON & EXCESS SLUDGE TERRAIN.

Suitable for:

IS 15298 Part 3
